### Poly-Glass 320 is an **eco-friendly** topcoat that meets federal guidelines for low VOC's.

Ensure the hardest surface with the best abrasion, mar and impact resistance available. This heavy-duty catalyst repeatedly helps repel coffee, ketchup, mustard, juice and food stains. It even helps guard against cigarette burns.

This catalyst is great for kitchen counters and vanities that tend to attract stains. It works well on a wide variety of materials including bathtubs, Formica, plastic, cultured marble and ceramic tile. Use this with our 320 coatings.

**APPLICATION:** This Poly-Glass® Stain No More Catalyst is specifically formulated for use with Poly-Glass® 320 resin. For the average job, mix 4 oz. of catalyst to 8 oz. resin (By volume). Thin with 2 to 5 oz. of 320 Medium Speed Thinner. Apply a tack coat followed by two even wet coats. Pause in between coats. Air cures water resistant in 2 hours at 75°F. Fully cures in 72 hours at 75°F.

### STORE INDOORS BETWEEN 50-90°F

Shake constantly for 15 - 30 seconds before using.
