Fish Eye Eliminator can help provide a smooth, professional finish by eliminating unwanted contaminants that produce unattractive gaps in the surface of the topcoat that are known as "fish eyes." This includes silicone, grease, fingerprints, and caulk residue. This occurs when contaminants prevent the urethane topcoat from adhering to the contaminated area. We always recommend wiping the surface with On The Spot Gun Cleaner or Silicone Digestor prior to priming, but when you need to combat hard to spot contaminants. Simply add NAPCO Fish Eye Eliminator to your topcoat formula for a visible difference your customers will appreciate.

APPLICATION: When using NAPCO's Fish Eye Eliminator, mix 2-3 capfuls of Fish Eye Eliminator per tub with resin into gun cup. Spray tub as usual. Close container tightly after use. Store in tightly closed, properly vented containers. Store in a dry place. Store indoors. Keep locked up and out of the reach of children.

STORAGE TEMPERATURE: 50 - 90°F.
