NAPCO's Kitchen Renew Waterborne Primer is a sprayable waterborne primer that allows you to beautify and transform your cabinets and other interior wooden surfaces by applying a

base color to provide adhesion and good hiding. NAPCO's Kitchen Renew Waterborne Primer is especially good at hiding dark stains and/or wood grain on cabinets. It's also fully tintable, which allows you to prime underneath the application of Flint-Stone™. Now you can go full waterborne when refinishing the kitchen!

APPLICATION: Kitchen Renew Waterborne Primer was specifically formulated to apply using an HVLP system with a #3 (1.3 mil) needle to ensure proper flow and excellent sprayability.

After masking hardware, taping and masking non-painted surfaces, and cleaning and prepping the surface, spray horizontally reasonably quickly for the first light coat. Allow the first coat to "tack" before applying the next coat. The light tack coat and two medium even coats should be sufficient coverage before applying the topcoat. Apply when surfaces and ambient temperature are between 60 and 85°F. Topcoat application should be done after 20 minutes of primer application. Any unused clean material can be placed back in the container, so no waste!
