We developed Universal Catalyst to make your life easier. One catalyst for numerous topcoats, it's a no-brainer! Universal Catalyst will work with: Poly-Glass Regular Dry Resin, Poly-Glass Quick Dry Resin, or Mega Fast Poly-Glass Resin. Just follow the easy 2 to 1 mixing instructions and spray away! We are confident this catalyst will quickly become the catalyst of choice and hold a permanent position in your truck.

APPLICATION: Universal Catalyst is specifically formulated for use with Poly-Glass® Mega-Fast Resin, Quick Dry Resin, and Regular Dry Resin. Please refer to the respective resin labels for curing times. For the average sized bathtub (or 35 square foot surface), mix 5 oz. of Universal Catalyst with 10 oz. of Mega-Fast Resin, Quick Dry Resin, or Regular Dry Resin (by volume). Thin with 5 to 7 oz. of All Purpose or Fast Thinner. Spray 1 light tack coat followed by 2 wet coats. Pause between coats to inspect work. Consult respective labels for drying times.
